

Audio Tech

DETAILED RESPONSIBILITIES

this person is responsible for listening to and fixing sound levels that go into the streaming switchboard. This person also uses the audio mixer to control if the sound comes from the computer or the main board. Must know how to operate the mixer. Cues will be completed for you before each Sunday service. If you want to mix manually, follow the instructions in this packet below

THE CONSTRUCT – The streaming service soundboard

Track – Each individual sound (ie-piano)

SOLO – this allows you to listen to only a specific track without messing with the entire mix. (ie, only hear the piano)

MUTE – this is to silence a specific track. You should mute all tracks when they are not in use to avoid getting unwanted noise

SLIDERS - this is to control the volume of the individual track.

RUNNING CUES

- 1.) Load the Sunday cue lists. On the right-hand side under SHOW CONTROL, click “view”

- 2.) Using the scrolly knob, scroll to the first cue (Usually prelude, check the service order)
- 3.) Press the knob
- 4.) Press the right arrow to confirm

- 5.) Now, you can click NOW to go to the next cue through the service and tweak

- 6.)
